Environmental Policy

RJS Cleaning Management Ltd recognises its responsibilities as a service organisation and concerns itself with both long and short-term effects of its business in relation to the environment.

Whilst we welcome the introduction of legal measures, we appreciate that real progress on environmental issues can only be made through the actions of individuals and organisations.

To this end we have adopted a positive policy to promote the practical day-to-day commitment to the environment, which permeates throughout the organisation and is reflected in the way we work, the materials and machinery we use, purchase and dispose of.

Specifically, we take action on the following measures:

- Protecting the Atmosphere
- To source and buy environmentally friendly chemicals
- To use trigger sprays whenever possible
- To minimise the use of energy at all times.
- To replace at the end of their lease, vehicles which give a reduced CO2 emission, as well as giving greater fuel economy

Environmental Working Practice

- Encourage full participation and commitment from all employees by carrying out appropriate training.
- Comply fully with all legal requirements at every location where it is employed.
- Ensure where legislation does not exist, that the Company set their own standards incorporating best industry practice in comparable activities.
- RJS Cleaning Management Ltd are committed to using non toxic cleaning materials i.e. natural and mineral ingredients
- All waste from our cleaning activities is disposed of in a safe and environmentally friendly Manner

Summary

We recognise the enormous value of our environment and aim to conserve and enhance it so as to leave to the children of tomorrow what was left for us. All our activities are designed with this in mind
